

New Peeples Middle School Design and Construction

The new Peeples Middle School (located immediately south of the current school's location at 290 Treehaven Drive) is a two-story building with 24 classrooms, 6 science labs, 4 technology labs, and 2 multi-purpose labs. Construction of the school is being funded by the November 2006 bond referendum. SOL's Engineering Services provided civil design engineering, environmental engineering, and construction support for the 16.2 acre site. The contract for building the New Peeples Middle School totaled \$16,500,000 in construction cost.
