

### **SOL Engineering Services On Its Way**

This year has been a successful year for SOL Engineering Services, LLC. SOL has definitely done its homework. In order to compete at the top, a business must possess the components and the needed qualifications to get the job done expeditiously and effectively. SOL is to be commended in both these areas. On July 20, 2006 SOL Engineering Services became 8(a) certified. Receiving a certification of this nature allows SOL to conduct business with the federal government and other entities.

Becoming 8(a) certified was a challenging but exciting task. SOL had the opportunity to prove that it has outstanding marketing and business ethic and is well organized. SOL has proven that it has what it takes. Congratulations to SOL once again for being a distinguished 8(a) certified firm!
